QUICK TIPS

1. Look for a fresh scape (stem) that has a first or second bloom on it
2. Look for a scape that is straight and free of blemishes
3. If the scape has more than one bloom, the blooms should not interfere with each other opening.
4. After selecting and cutting the scape, carefully wipe the full length with a clean, soft cloth, watching for spiders or webs that might need to be removed.
5. Transport blooms to the show in containers that allow each scape to stand free of the others.
